

Subdecay Studios – Super-Nova-Drive Universal Overdrive

The Super Nova Drive is hand made in Newberg, Oregon with high quality components. Thank you for purchasing The Super Nova Drive.

What is the Super Nova Drive?

The Super Nova Drive is an overdrive effect with a three band active EQ. The gain range is enormous, and the tone controls' frequency bands are tailored to electric guitar.

Controls:

Drive- Controls overall preamp gain.

Level- Controls overall volume

Bass, Mids & Highs- Three band active EQ

Warranty:

Subdecay Studios offers a 3 year limited warranty from the purchase date to the original purchaser. This warranty does not cover misuse, or the neglect of the user. It also does not cover the finish, paint, or any exterior, or superficial damage. Any unauthorized repairs will void warranty. Subdecay Studios, Inc assumes NO LIABILITY for this product.

Power:

The Super Nova Drive can be powered by a standard 9 volt battery, or by a dedicated Class II regulated 9 to 18 volt DC power supply with a negative center 2.1mm barrel type plug. Current draw under normal operation is less than 10mA. If using a "daisy chain" power supply all other units on the power supply MUST be negative ground.

Battery:

To change the battery you must first remove the 4 rear screws and the rear cover. The battery should be placed next to the switch in the battery compartment. The battery should be able to slide in and out with out any friction. If the battery needs to be forced in to place, it could damage the pedal. **Battery Life** When using a battery always unplug the instrument input to conserve battery life. When a cable is plugged in the pedal is always on, even when bypassed.

Specifications:

Input impedance: 1M
Output Impedance: less than 50K depending on volume setting.
True Bypass.

Operation and Care:

Keep away from extreme heat, cold and moisture.
Use only a dry towel to clean.
No user serviceable parts.
Contact Subdecay Studios, Inc. for repair or maintenance.
